TruNorth® Hazelwood, Amazon Gray deck by, Green Shield Deck Builders

Why choose TruNorth?

Eco innovative materials

Heat Blocking Technology

Industry Leading Warranties

4 Sided Capping

Class A & B Fire Rating

Beautiful • Strong • Timeless

INVEST ONCE

Enjoy for decades

When it comes to outdoor spaces, long-term performance matters.

TruNorth® Composite and Clubhouse® PVC decking are engineered to deliver lasting beauty and strength without the ongoing repairs, staining, or replacement costs of traditional wood decks.

Wood requires constant upkeep, absorbs moisture, and is vulnerable to rot, mold, and weathering. TruNorth® and Clubhouse® products resist fading, staining, and water damage, stay cooler under the sun, and maintain traction when wet — ensuring safe, beautiful surfaces for years to come.

Sustainable Innovation **Beyond Wood**

What sets us apart from the competition?

- Heat Block technology (20% cooler than our competitors)
- Superior Slip Resistance
- Best-selling color options
- Superior strength
- Highest flame spread rating
- Sunshield color performance
- Highest resistance to water absorption
- The most fastening options
- Designed for North American climates

CLUBHOUSE

AURORA

Clubhouse® Aurora PVC decking delivers more than 30 years of proven performance in some of the harshest outdoor conditions, providing exceptional resistance to UV exposure, heavy rainfall, and persistent humidity.

Engineered for long-term structural integrity, it maintains a splinter-free, crack-free surface that stands up beautifully season after season.

Designed with superior heat-mitigation technology, Aurora stays up to 20% cooler underfoot than traditional composites, ensuring a safer, more comfortable surface for barefoot lounging, everyday use, and pet-friendly outdoor living—no matter the weather.

For the Pros

Our composite decking is engineered for fast installs, clean cuts, and a flawless finish with the tools you already use. Clubhouse® decking works seamlessly with the CAMO® LEVER Deck Tool, Dexerdry tools and membrane, and the CAMO ClipDRIVE® Fastening Tool for quick, precise, watertight builds. TruNorth® decking is also fully compatible with the CAMO LEVER and ClipDRIVE systems, giving you a smooth, reliable installation across the entire product line.

OUR STORY

Began with a simple idea: composite decking didn't have to be complicated, inconsistent, or controlled by massive corporations. As a small and independently owned company, we set out to build something better — products that installers could trust, homeowners could be proud of, and the industry couldn't ignore. What started as a modest operation with big ambitions has grown steadily year after year, driven by stubborn determination, hands-on innovation, and a commitment to doing things the right way, not the easy way.

From day one, our values have shaped every decision we make. *We believe in craftsmanship you can feel, integrity you can see, and partnerships that last longer than the boards we produce.* We keep our operations tight, our standards high, and our focus clear: create decking that performs in the real world, not just on paper. Every board that leaves our doors is backed by a team that stands behind it — a team that treats quality like a responsibility, not a marketing tagline.

We're proud of how far we've come, but we're nowhere near finished. Being independently owned means we answer to our customers, not shareholders, and that drives us to continuously refine, innovate, and push the boundaries of what composite decking can be. We're striving to set the standard for the industry, not follow it, and we're investing every day in new materials, better processes, and smarter solutions. Our mission is simple: to be the leader in composite decking by delivering products that outperform, outlast, and outshine anything else on the market — and to do it with the heart and grit of a company that refuses to settle.
